

## PacsoftNG Boatyard Haulout & Storage Module

The Pacsoft Haulout and Storage Module is an easy to use boatyard management and invoicing solution ideal for boatyard operations.

This module is designed as a very simple yet comprehensive tool for effective management of boatyards of differing sizes and business requirements. The Boatyard module allows users to quickly manage bookings for travel lift, slipways and cradles; enables quick booking changes with drag and drop, and the ability to add yard hard standing charges.

Other features include: extra wash time and forklift hire or any other service you provide; quote generation, invoices and operational reports for lift and yard management.

These features enable you to avoid the paper war and take back control of your business.

### General Business Benefits

- Maximise return through effective management of vessels, berth rentals, jobs and customer information.

### Fast Booking Service

- Quick and Easy Booking
- Drag and drop changes
- Drag between different equipment calendars
- Improve equipment utilisation
- Link to a job.

### Improved Customer Service

- Accurate and Fast Invoicing prior to launches.

### Improved Accounting

- Reduce mistakes with automatic calculation of charges based on vessel length or area, etc
- Batch invoice processing for long term storage clients.

### Improved Operations

- Daily Lift schedules for equipment operators
- Retain the technical knowledge of lifting, strap positions and chocking details within Pacsoft
- Reduce reliance on key staff with vessel technical details recorded in Pacsoft
- The visual hardstand map assists with vessel placement and yard space planning
- Understand why people come to your yard – know your weaknesses
- Understand which tenants bring business to the yard. This information is valuable when it comes to negotiating rental or lease reviews.

## PacsoftNG Boatyard Job Costing Module

The Pacsoft Job Costing Module is an easy to use boatyard job management, invoicing and costing solution ideal for boatyard operations.

This module is designed as a very simple yet comprehensive tool for effective management of boatyards of differing sizes and business requirements. The boatyard module allows quoting on vessel maintenance and repair jobs, tracking costs associated with work in progress, creating purchase orders, monitoring and controlling inventory levels, full job costing, labour timesheets, inventory management and much more.

The quote generation is a helpful tool that accepts transfers from the quote to a job, adds change variations as required, tracks jobs and task progress along with profitability. The timesheet entry and supplier invoice capability is simple and easy to use. The module also shows a full history of all jobs and work, with the ability to store details of work including photos.

These features enable you to avoid the paper war and take back control of your business.

### Improved Customer Service

- Quality quote document
- Quality and detail invoices on the work done and parts used
- Keeps technical details on plant, equipment, key parts and warranty for the owner
- Full History of work done and parts used.

### Improved Operations

- Understand where staff are spending time - Detailed staff timesheets
- Understand maintenance costs of boatyard equipment.

### Improved Profitability

- Ensure correct invoicing and charging on jobs
- Understand the costs versus job progress
- Know the profitability of jobs including fixed price jobs
- Control inventory usage and ensure charged correctly
- Ensure all purchases allocated to jobs are charged.
